(2) The Government of Canada recognizes that Southern Resident Killer Whales (SRKW) face imminent threats to their survival and recovery. Management measures have been implemented to help address the key threats of reduced prey availability (primarily Chinook Salmon), and acoustic and physical disturbance. These measures include salmon fishery closures, Interim Sanctuary Zones that restrict vessels from entering (including fishing), Speed Restricted Zones that restrict vessels to a maximum of 10 knots in designated areas (including fishing), minimum approach distances and a number of voluntary measures including to stop fishing (do not haul gear) and reduce speed to less than 7 knots when within 1,000 metres of killer whales and let them pass, and a voluntary speed reduction zone in Tumbo Channel.

(3) For more information about the current SRKW management measures, please visit <https://www.canada.ca/southern-resident-killer-whales> or contact the Marine Mammal Team at DFO.SRKW-ERS.MPO@dfo-mpo.gc.ca. For more information on the best ways to help whales while on the water, please visit: bewhalewise.org.

(4) If a marine mammal becomes entangled in fishing gear, fishers should immediately call the Observe, Record, Report (ORR) line at 1-800-465-4336. Fishers are advised not to attempt to free the animal of the fishing gear as this can pose a serious threat to the safety of the fisher and the animal. If your vessel strikes a whale, or if you observe a sick, injured, distressed, or dead marine mammal in B.C. waters, please contact the hotline immediately or VHF Channel 16.

19. Avoidance of entanglement of Basking Shark in fishing gear:

(1) Pursuant to subsection 73(2)(c) and section 74 of the Species at Risk Act (SARA), this licence authorizes the vessel master, subject to the following conditions, to engage in fishing activities that:

- (a) are conducted under licences issued under the Fisheries Act; and
- (b) incidentally kill, harm, harass, capture or take Basking Shark (*Cetorhinus maximus*).

(2) Pursuant to subsections 73(2)(c) through 73(6) of SARA, the vessel master must ensure:

- (a) that while the fishing activities are conducted, every measure is taken to avoid the incidental capture of Basking Shark;
- (b) that while the fishing activities are conducted, fishing gear is not set or hauled when Basking Sharks are within 10 m of the fishing vessel, and/or are visible at the water's surface; and
- (c) that while the fishing activities are conducted, any Basking Shark incidentally caught and live, is released in a manner that causes them the least harm.

20. Shark Finning Prohibition:

(1) No person shall remove and retain the fins of any Spiny Dogfish or shark without retaining the remainder of the carcass for validation upon landing. The number of fins landed must correspond to the number of carcasses landed.

21. Lost Gear Reporting:

(1) The licence holder/operator must report any of their lost fishing gear within 24 hours of returning to port at the end of the fishing trip. Reports of lost gear must be submitted to Fisheries and Oceans Canada (DFO) by completing the Lost Fishing Gear form available online at:

<http://www.dfo-mpo.gc.ca/fisheries-peches/commercial-commerciale/reporting-declaration-eng.html>. If using an electronic logbook, the licence holder/fishing vessel operator must report any of their lost fishing gear to DFO by completing the section reserved for that purpose in the electronic logbook.

22. Retrieved Gear Reporting:

(1) The licence holder/operator must report the retrieval of any of their own previously reported, lost gear within 24 hours of returning to port at the end of the fishing trip. Reports of retrieved gear must be submitted to Fisheries and Oceans Canada (DFO) by completing and submitting the Retrieval of Previously Reported Lost Fishing Gear form available online at: <http://www.dfo-mpo.gc.ca/fisheries-peches/commercial-commerciale/index-eng.html>. Retrieval can only occur during the validity period of these licence conditions and only in relation to the specific type of gear authorized to be used by these licence conditions. If using an electronic logbook, the licence holder/fishing vessel operator must report the retrieval of any of their own, previously reported, lost gear to DFO by completing the section reserved for that purpose in the electronic logbook.

23. Hazardous Discards:

(1) The licence holder and vessel master, when fishing under these conditions of licence, are prohibited from discarding in Canadian fisheries waters from their vessel any item that may be harmful to fish or fish habitat including but not limited to plastics, ropes, fishing gear, garbage bags, fuel, oil, rags, glass, bottles, metal, extruded polystyrene foam (e.g. Styrofoam) and tires.

24. Sea Turtle Reporting:

(1) If you see a sea turtle, please call this toll-free phone number: 1-866-I SAW ONE (1-866-472-9663). Please include information such as the species of sea turtle seen (e.g. leatherback), the location and time of sighting.

25. Seabird Reporting:

(1) Environment and Climate Change Canada continues to monitor seabird by-catch in net fisheries. Please retain and provide all dead birds entangled in nets to DFO, or call the BC Wild Bird Mortality Line (1-866-544-4744). Handle birds with gloves, double bag dead birds and label each with date, time, location, and store them on ice. Alternatively, send a photograph of birds with a reference object (e.g. coin) to Laurie.Wilson@ec.gc.ca. For more information contact Laurie Wilson (Laurie.Wilson@ec.gc.ca, 604-862-8817).
