(2) Validation reports shall be forwarded from the Dockside Monitoring Company to DFO on a weekly basis.

(3) The vessel master shall ensure that Ecotrust dockside observers conduct a thorough check of the fish holds and containers on deck to ensure all fish have been offloaded. At the designated landing site, catch retained for FSC may remain on-board the vessel provided the Ecotrust dockside observer is permitted access to the vessel in order to count and identify the species of fish retained.

13. Split Offloads:

Fish retained for FSC purposes may be offloaded before being validated at the designated landing site at a location other than the designated landing site if the Fishery Manager from the vessel master's First Nation monitors the landing and verifies the pieces and species of fish caught and retained. The vessel master's First Nation's Fishery Manager will generate an offload record for the vessel master when the vessel master offloads catch under the authority of this Licence. Where fish retained for FSC have been offloaded prior to arriving at the designated landing site, the vessel master shall provide the Ecotrust dockside observer a copy of the offload record provided by the vessel master's First Nation's Fishery Manager. This offload record will include the following information, in respect of the FSC Communal Fishing Licence:

- a) A copy of the landed catch information by species and piece;
- b) Vessel name;
- c) Vessel master's name;
- d) Vessel master's T'aaq-wiihak designation Card number; and
- e) Vessel's T'aaq-wiihak decal number.

14. Tagging and Biological sampling requirements

(1) Vessel masters shall permit dockside observers access to catch for the purposes of sampling for coded-wire tag (CWT), DNA or other biological parameters as required at designated landing sites. Sampling protocols are to be developed with Ahousaht, Ehattesaht, Hesquiaht, Mowachaht/Muchalaht, and Tla-o-qui-aht First Nations and DFO in-season.

(2) All Halibut retained for sale must be tagged by a dockside observer prior to sale. To facilitate catch sampling by the International Pacific Halibut Commission, if required, all Halibut shall either be landed fresh, dressed head-on or fresh, round head-on.

15. Transportation of Catch by Vehicle

Pursuant to Section 10 (Dockside Validation), a vessel master / fisher must carry a Landing Slip when in possession of fish caught under authority of this licence, except when fishing or transporting fish to a Landing Site by water.

All fish must be transported and validated in one shipment and kept separated by fisher during transport. The vessel master / fisher shall show Landing Slips to a fishery officer or fishery guardian upon request.

16. Vessel to Vessel Transfer

(1) Transferring of catch from one vessel to another is permitted provided that the vessel accepting the fish does not land more than the trip limit or vessel cap including the transferred amount and that vessel's own catch combined.

(2) Transferring of catch from one vessel to another that results in a total landed catch that exceeds the trip limit or vessel cap must receive advance permission from the vessel master's First Nation's Fishery Manager for the transfer to be authorized.

(3) The First Nation's Fishery Manager that authorizes such transfers must inform the Ha'oom Society Fisheries Manager and the dockside monitoring service provider.

All fish must be transported and validated in one shipment and kept separated by fisher during transport. The vessel master / fisher shall show Landing Slips to a fishery officer or fishery guardian upon request.

17. Marine Mammal Reporting:

(1) Participants shall report all marine mammal interactions during fishing trips in the Fishing Log. For the purpose of defining lethal and non-lethal marine mammal interactions, interactions include bycatch, collision, and all sightings of marine mammals entangled in fishing gear.
